

Bioinorganic Chemistry

Spring Semester 2009

Instructor: Dr. Ronald Viola
Office: WO3216
Contact: 530-1582 (office) 530-1583 (Fax)
ron.viola@utoledo.edu (email)

Lectures: W, 1 – 4 PM, BO2083
Office Hours: M, 3 – 4 PM, or by appointment

Text: “Principles of Bioinorganic Chemistry” (1994)
by S. Lippard and J. Berg

Prerequisites: The formal prerequisites for this graduate course are a course in Biochemistry and in Inorganic Chemistry. You are expected to have a background in each of these areas.

Attendance: You are expected to attend every scheduled class meeting and participate in class discussions

Preparation: You should review the material to be covered in class BEFORE it is presented in the lectures. Copies of each presentation will be available on my research group web site:
<http://aries.wo.utoledo.edu/viola/>

Examinations: There will be two full period exams. Each exam will cover only the material that is presented during the lectures in that portion of the course.

Grading: Each exam will account for one-half of the final course grade, with your level of participation during the lectures accounting for any adjustments in your final letter grade.
